8. a. What is the role of stress in bringing on your patient's symptoms?

b. To what degree can your patient tolerate work stress?

- Incapable of even "low stress" work Capable of low stress work
 Capable of moderate stress - normal work Capable of high stress work

Please explain the reasons for your conclusion: _____

9. Do your patient's physical symptoms and limitations cause emotional difficulties such as depression or chronic anxiety? Yes No

Please explain: _____

10. Do emotional factors *contribute* to the severity of your patient's subjective symptoms and functional limitations? Yes No

11. Have your patient's impairments lasted or can they be expected to last at least twelve months? Yes No

12. As a result of your patient's impairments, estimate your patient's functional limitations if your patient were placed in a *competitive work situation*.

a. How many city blocks can your patient walk without rest or severe pain? _____

b. Please indicate how long your patient can sit and stand/walk *total in an 8-hour working day* (with normal breaks):

Sit	Stand/walk	
<input type="checkbox"/>	<input type="checkbox"/>	less than 2 hours
<input type="checkbox"/>	<input type="checkbox"/>	about 2 hours
<input type="checkbox"/>	<input type="checkbox"/>	about 4 hours
<input type="checkbox"/>	<input type="checkbox"/>	at least 6 hours

c. Does your patient need a job that permits shifting positions at will from sitting, standing or walking? Yes No

d. Will your patient sometimes need to take unscheduled breaks during a working day? Yes No

If yes, 1) how *often* do you think this will happen? _____

2) how *long* (on average) will your patient have to rest before returning to work? _____

3) on such a break, will your patient need to lie down or sit quietly?

e. With prolonged sitting, should your patient's leg(s) be elevated? Yes No

If yes, 1) how **high** should the leg(s) be elevated? _____

2) if your patient had a sedentary job, **what percentage of time** during an 8-hour working day should the leg(s) be elevated? _____ %

3) what symptoms cause a need to elevate the leg(s)? _____

For this and other questions on this form, "rarely" means 1% to 5% of an 8-hour working day; "occasionally" means 6% to 33% of an 8-hour working day; "frequently" means 34% to 66% of an 8-hour working day.

f. How many pounds can your patient lift and carry in a competitive work situation?
